

NEUROTWIN

HORIZON 2020 PROJECT

Kick-off meeting
30.09.2019, Kyiv

Olena Borovska,

Finance Director, KAU Innovation Centre , Ukraine

This project has received funding from the European Union's H2020 Programme for Coordination and support action under grant agreement no 857562.

The main goal is to provide assistance to innovative projects from a stage of creation of the idea to the stage its commercialization.

- Project & Grant Management Department**
- Science-Industry Workshops**
- Translational Research Office**

➤ **Project & Grant Management Department**

- **is engaged in submission of the applications for grants and preparation of the projects also in attracting of additional resources for the purpose of support innovative developments of scientists and their commercialization.**
- **Is engaged to informs and advises scientists on applications for grants to European and other international financial institutions (Horizon 2020, STCU, CRDF, NATO, DAAD, JRC and others).**

Department also cooperates with representatives of business, other scientific institutions and institutes, higher education institutions, non-governmental public organizations and public authorities of local government.

SERVICES:

- monitoring of grant competitions and their analysis;
- assistance in obtaining information on grants;
- assistance in writing grant applications;
- assistance in applying for grants;
- assistance in organizing consortia;
- budget assistance and support;
- grant agreement assistance and support.

➤ **Science-Industry Workshops**

- monitoring of innovative "requests" from business, creation a database of such requests
- working with scientists on the topics of innovative “requests” (search in Research Groups in BIPh or partner institutes)
- working with scientists on a presentation for the business of their development, creating a presentation that the scientist will present at the events
- involving major industrial stakeholders from biomedical services and health care institutions
- organizing the workshops

Partner for the organization of the workshops for scientists and business representatives: KAU Innovation Center.

➤ **Translational Research Office**

Directions:

- scientific developments
- international patents

scientific developments

In order to update and consolidate information about scientists and research groups of the BIPh (in the format of a modern multifunctional database) and to simplify the search system for scientists, research groups by local and foreign partners, **it is possible to create an additional page or portal: Research groups.**

This database will help to unify and update information, consolidate information on scientists and research groups and developments on the Institute's portal in the form of a modern and multifunctional database, simplify the search system for scientists, research groups for local and foreign partners / business (keywords , research topics, group leaders).

international patents

- training in the rules of foreign patenting
- training in the methods of searching, working with foreign patent bases
- consulting support for scientists in the use of databases
- conducting patent search and analysis to identify the prior art, innovative trends and predict their development
- search for possible ways of commercialization of intellectual property (assistance in search of partners, investors, markets of realization)
- adaptation of patent applications to the technology transfer offices of our foreign project partners

Consultation: TISC (Technology and innovation support center).
