

NEUROTWIN

HORIZON 2020 PROJECT

31.09.2019, Kyiv

Boris Safronov,
Institute of Cellular and Molecular Biology, Porto, Portugal

This project has received funding from the European Union's H2020 Programme for Coordination and support action under grant agreement no 857562.

We all need to publish our data

How to organize the paper

Putting too much in one paper makes it diffuse and difficult to understand

Paper should be focused on one topic

We like to publish more, BUT to read less !!!

We all are readers ...

- 1) **Figures** (should be informative)
- 2) Title, Abstract, Introduction, Methods, Results, Discussion
- 3) Methods, Results, Discussion, Introduction, **Abstract and Title (90% of researches read only these parts)**
- 4) **Abstract and Figures** should be understandable without reading the whole paper

Problems:

Some **problems** are national

” **Bezalabernost** ”

Editor will correct the paper

It is important to realize that:

we like our papers, editors may not.

Even if the paper is good, do you have a great fun to read it?

No, this is a hard work

Typos (rejection may be based on **irritation** !!!!)

Formatting

Inconsistent **terminology**

Wrong or dead **references**

Irrelevant **self-citations**

Remember:

All classical papers are very well written !

Try to read your paper as another person.
